

To whom it may concern

Rolf-Peter Kudritzki
Professor of Astronomy

August 22, 2017

Subject: Habilitation Dr. Dariusz Graczyk
Publication Graczyk et al. 2014, ApJ 780, 59

Dear colleagues,

With pleasure I comment on my contributions as co-author to the publication Graczyk et al., 2014 (see above). Dr. Graczyk as the first author carried out the key work for this paper. My contributions concerned some of the discussion and interpretation of the scientific results. In addition, I was also involved in the preparation of some of the proposals for observing time, which then led to the accumulation of observational data related to the results obtained.

With kind regards and

Aloha!
